

Slide and Tilt
Vehicle Storage Solutions

OTAR STORAGE SYSTEM

Otar Storage “Slide and Tilt” is an innovative system designed for special vehicles.

Studied to satisfy the needs of emergency vehicles, such as firefighters trucks, airport vehicles, military vehicles, but it can also be mounted on pick-ups or drawers for batteries, basically everywhere there is a need of goods transportation, that has to be quick to install, heavy-duty capacity and completely corrosion resistant.

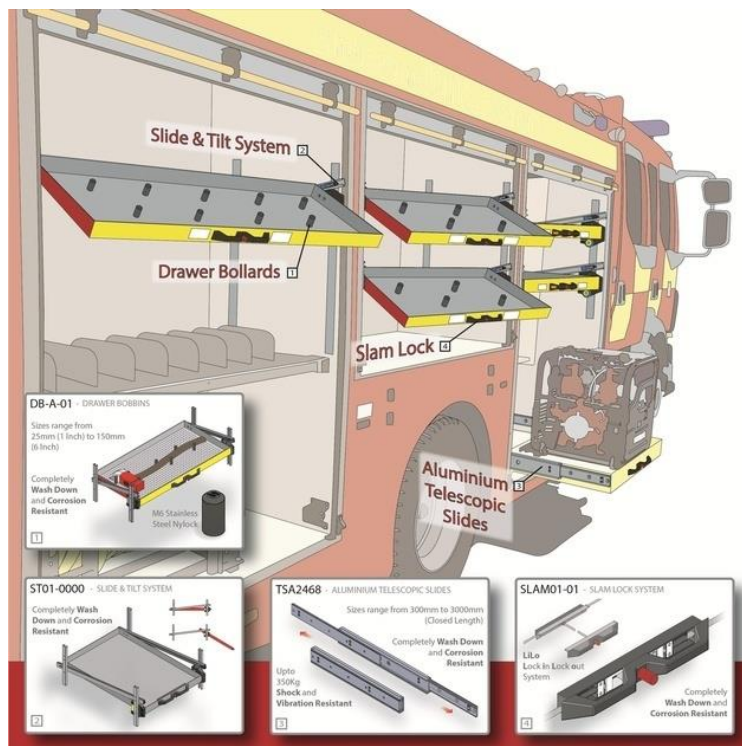

ADVANTAGES

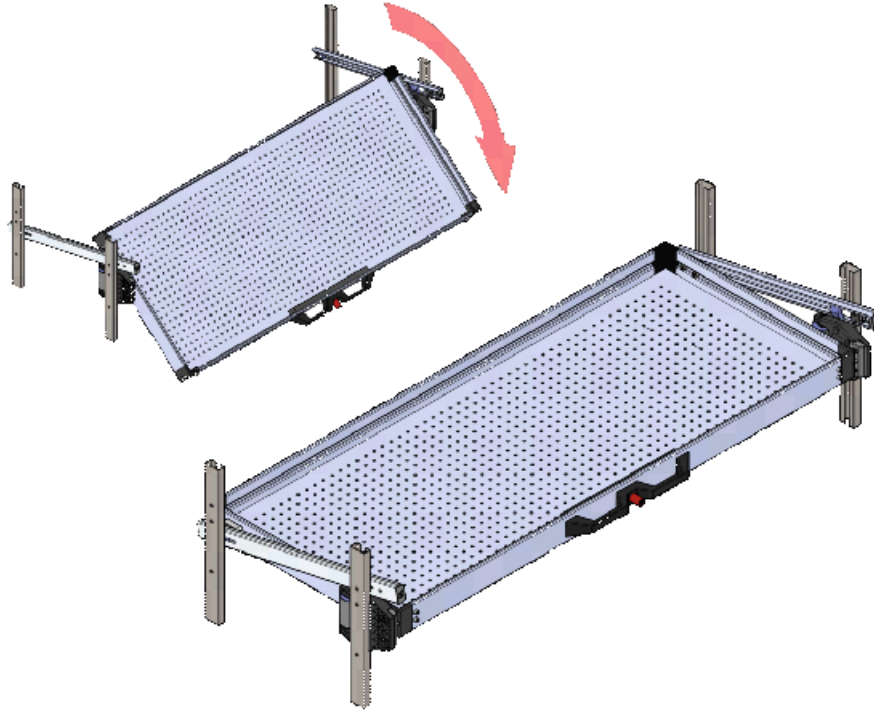

The system allows completing the vehicles with innovative aluminium drawers, with telescopic slides or slide and tilt guides of the same material, with a number of advantages for the end user:

- Lightweight
- Heavy-duty
- Corrosion resistant
- Washable
- Great slides
- One hand operation
- Quick & easy to fit
- Maintenance free
- Bespoke sizes
- Retro fit to any vehicles

Thanks to our modular assembly, we are able to provide the finished system, of bespoke sizes, ready to be installed and used after fixing few screws, drastically reducing the time of vehicles fitting.

The system offers many advantages that transfer quality and benefits to the vehicle. With few data and measures, Otar Spa can provide detailed quotation, short lead-time and meet customers’ need.

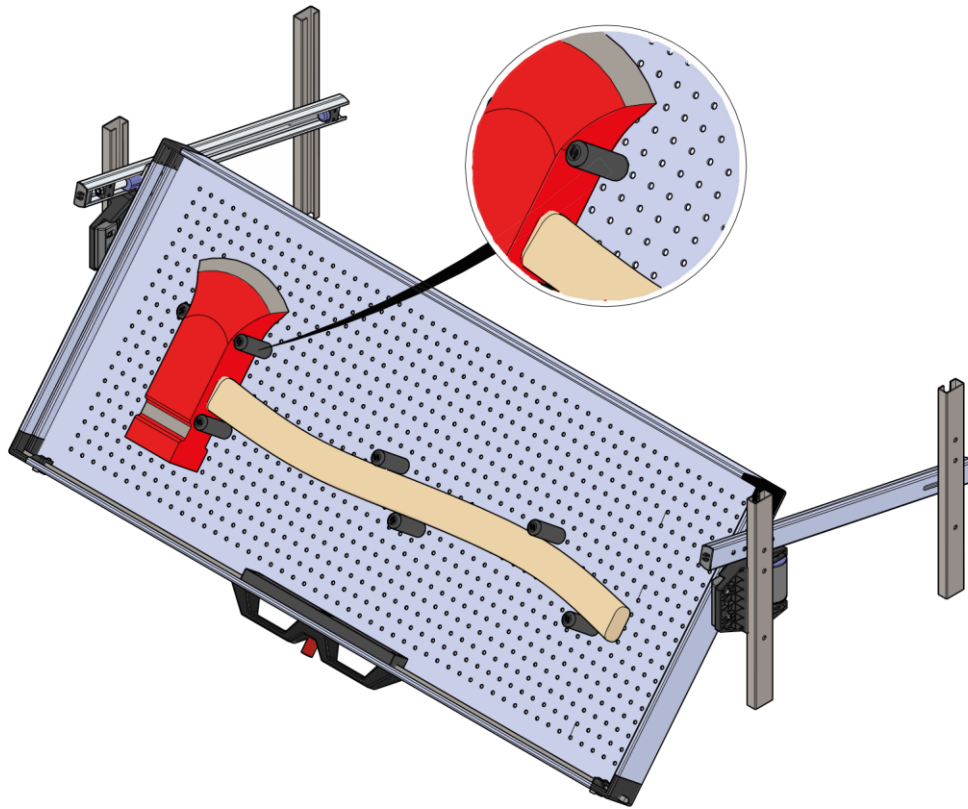

Our Slide and tilt system has been tested to support heavy-duty workloads without the necessity of any maintenance, that together with the possibility of being completely personalized adapting to any emergency vehicle on which is installed, **drastically reduce the fitting time and the necessity of manual work.**

Our tests have proven that after 60.000 cycles with a 35 kg load, our drawer in standard measures (10005 x 410 x 100) was still perfectly functioning without losing any performance. Contact us for more information about the load capacity of our drawer and the suggest one for health and safety.

As said, our drawers are designed to be personalized and to reduce the fitting time. Thanks to the design of the inner part of the drawer, it can transport any kind of equipment, guaranteeing the maximum flexibility, using heavy-duty plastic bobbins of different sizes. Extremely fast to be fixed to the drawer, the bobbins allows to fix any equipment to the drawer, saving a massive amount of time.

Slam Locks 37

SLAM01-01

Slam Lock Standard
Assembly Kit

LiLo-01

Lock in Lock Out Kits
available

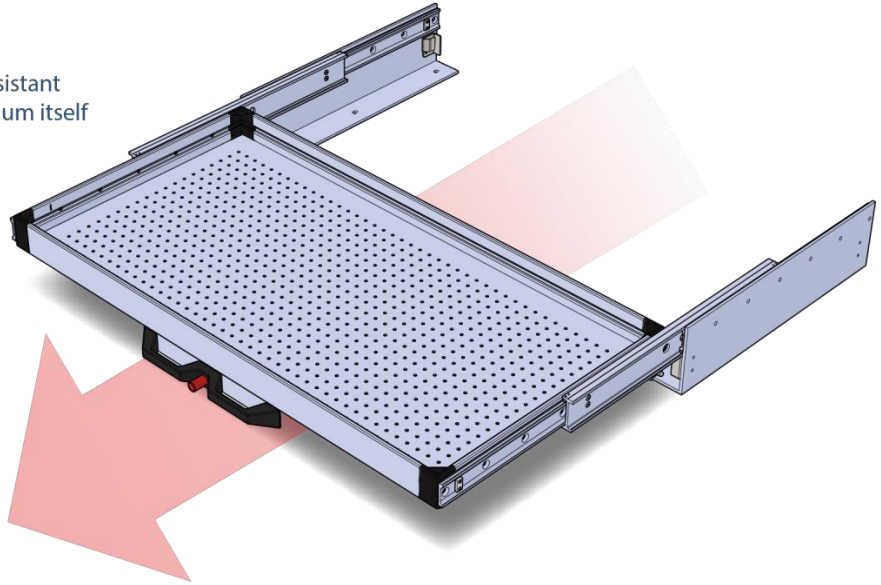

The handle is fitted with a spring and it guarantees a solid lock for the drawer, avoid that the contents fall over and as all other components of the system is corrosion resistant and tested for a huge number of cycles in order to assure the maximum duration and being maintenance free.

with LiLo Kits

Bespoke sizes available
Completely wash down and corrosion resistant
Bonding agent stronger than the aluminium itself

Our sliding drawers are as good as our slide and tilt ones, with the same characteristics that make them ideal for emergency vehicles.

The sliding drawer is particularly useful in the custom version for pick-ups, providing a massive help in the loading and unloading of the goods, thanks to the extendable corrosion resistant and heavy-duty support. Our product has been tested to support 500 kg load when closed and 250 kg load when extended (up to 70% of its length)

Modular Assembly

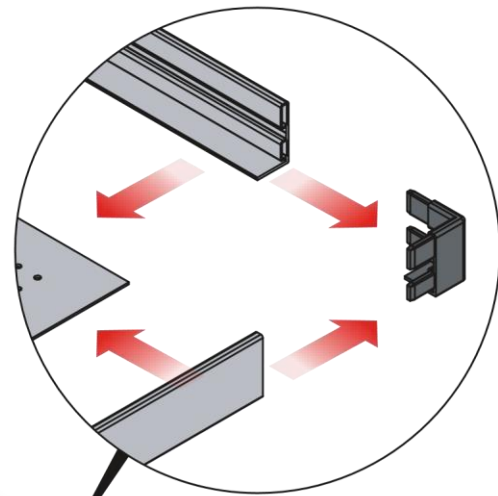

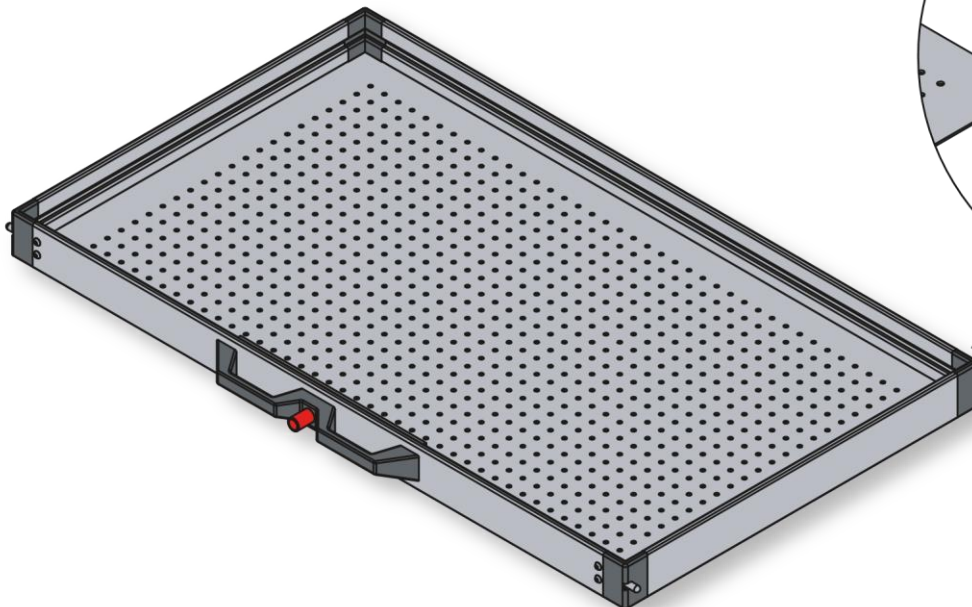

MTA01-01

Complete modular tray assemblies

Bespoke sizes available

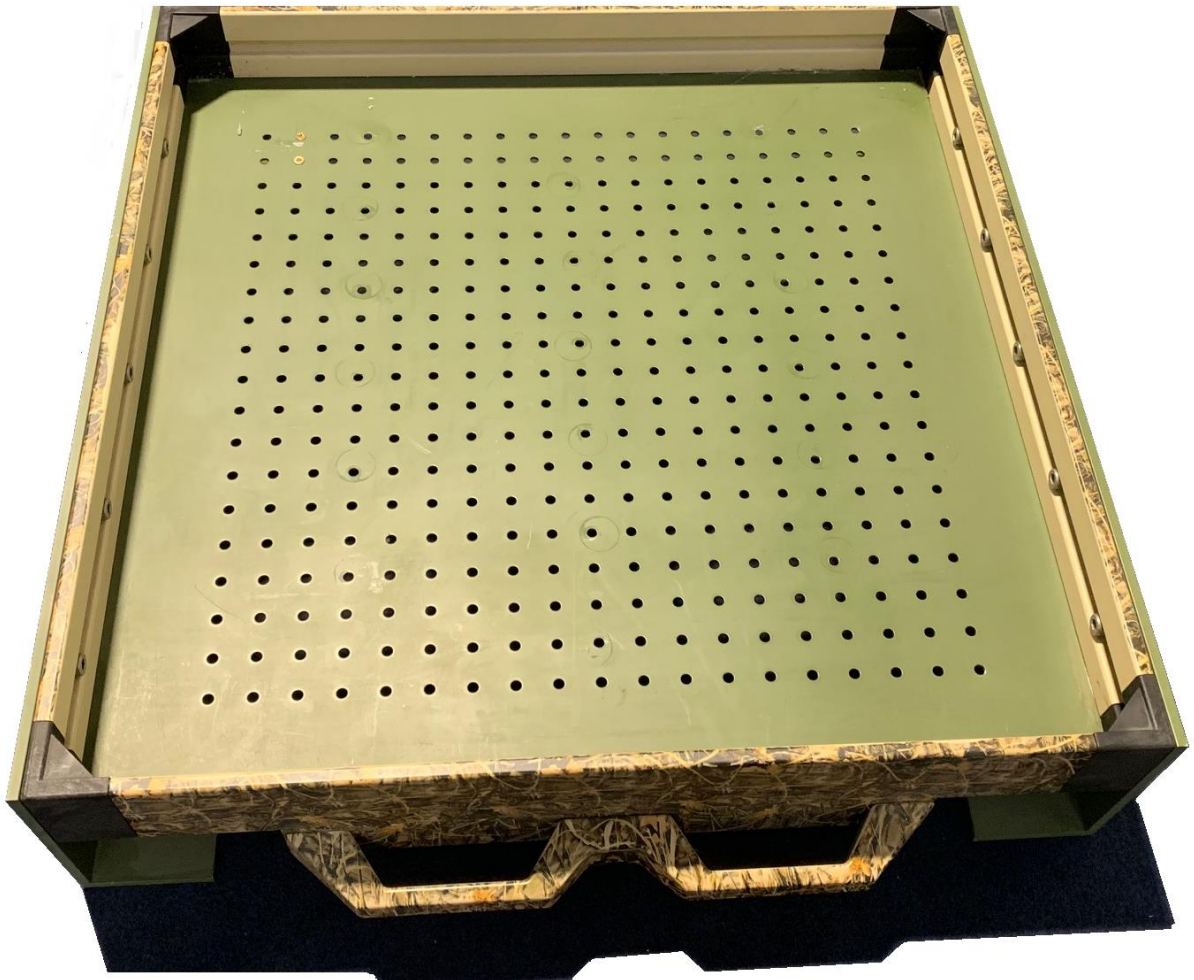

Completely wash down and corrosion resistant

Bonding agent stronger than the aluminium itself

In order to guarantee the maximum flexible and bespoke offer, our drawers are manufacture with a modular assembly, in aluminium with thermo-plastic joints that are actual stronger than the aluminium itself, guaranteeing a load and stress resistance without comparison. They can also be personalized in regards of, tilt angle, bobbins sizes, measures, colours in order for them to adapt to any kind of vehicles, also military.
